Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The examiner agrees with Applicant's argument regarding claims 1-19 that there is no objective suggestion to combine the Robar et al., Blum and Parrini et al. references to teach the system, assembly and method of monitoring an elevator support structure condition, including the means and steps of translating at least one of the measured electrical characteristic and an electrical characteristic of at least one portion of a virgin support structure to correspond with a reference temperature to reflect an effect of a temperature as indicated by said at least one temperature sensor, wherein a value corresponding to the measured electrical characteristic is a measured value and a value corresponding to the electrical characteristic of the virgin support structure is a reference value, and calculating a difference between the measured value and the reference value and compares a value corresponding to the difference with a predetermined threshold to determine a support structure condition, as recited in the independent claims 1, 8 and 13. Claims 2-7, 9-12 and 14-19 are allowed based on dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
